Executive Council Secretary (Governance documents) -

Reprinted annually in January and updated throughout the year on the New Zealand Cat Fancy Inc. website at: www.nzcf.com

DESCRIPTION OF CONTENT

1. * **Breed Codes marked thus * are for registration purposes only**, and are **not** to be printed in any Show Schedules as published by Clubs. These Breed Codes do **not** as yet have an official NZCF Inc. Standard of Points. **Cats registered with Breed Codes marked * shall be exhibited together with other exhibits of the applicable breed registered with the letter "Z" of that Breed, i.e. they shall be exhibited as AOC of their own breed with NO CHALLENGE CERTIFICATES.**
2. Breed Codes with no annotations whatsoever are all entitled to challenge certificates with the exception of those detailed in para. 3 below.
3. Challenge certificates are **not** offered to:

Breed No. AOV L Any Other Variety LH Breed/Type Division.
Breed No. AOV S Any Other Variety SH Breed/Type Division.
Any L/H and S/H Breeds with colour suffix 'Z'.
Any variants of a Breed
Kittens.

4. (i) **L/H - Cream & Red Tabby/Cream & Red Self Registrations (DUAL) must use their Dual Registrations**, (Refer Registration Rule 6.4) Non-Agouti crossed with Non-Agouti: Any red progeny born of non-agouti parents, but with the phenotype of an agouti, may be registered as a Red Tabby, but shall have the Registration Certificate endorsed with the genotype of non-agouti recorded, e.g. PER F/D(na) and not just the Tabby Breed Number, but they will be exhibited and judged as the **"Tabby"** Phenotype.
(ii) **S/H - Cream & Red Tabby/Cream & Red Self Registrations (DUAL) must use their Dual Registrations**, e.g. SIA F/D(na) or SIA F/G(na) or ORI F/D(na) and not just the Tabby Breed Number, but they will be exhibited and judged as the **"Tabby"** Phenotype.
5. (i) **L/H - Non-Smoke, Non-Shaded, Non-Silver Tabby Progeny from Silver lines must use their Dual Registration**, e.g. PER(s), and not just the non-silver Breed Code, but they will be exhibited and judged as the **Non-Silver** phenotype.
(ii) **S/H - Non-Smoke, Non-Shaded, Non-Silver Tabby Progeny from Silver lines must use their Dual Registration**, e.g. OSH(s), and not just the non-silver Breed Code, but they will be exhibited and judged as the **Non-Silver** phenotype.
6. (i) **All Persians** with Breed Codes marked with an asterisk * must be exhibited as Breed PER Z. **All other Longhair Breeds have the colour suffix "Z" for "Any Other Colour"** of the applicable breed for show purposes. All colours and patterns of these breeds that do not already have their own breed code listed shall be exhibited under the applicable breed code with colour suffix 'Z'. If no breed code exists they must be exhibited as Breed AOV L. Breed Codes PER Z (AOC Persian) and AOV L **are two separate classes**.
(ii) **All Shorthair Breeds have the colour suffix "Z" for "Any Other Colour"** of the applicable breed for show purposes. All colours and patterns of these breeds that do not already have their own breed code listed shall be exhibited under the applicable breed number with colour suffix 'Z'. If no breed code exists they must be shown as AOV S. (Exceptions to this are Breed SCS Scottish SH and Breed SCL Scottish LH which must be exhibited as AOV S until these breeds have an official NZCF Inc Standard of Points.)
7. (i) **L/H - All generation 1 cats** which exhibit the phenotype of their breed must be exhibited

**New Zealand Cat Fancy Inc.
Schedule of Breed Codes 2010**

according to their registration code which may be Breed AOV L or may be the breed code of their designated breed, depending on the breeding programme.

- (ii) **S/H** - All generation 1 cats which exhibit the phenotype of their breed must be exhibited according to their registration code which may be Breed AOV S or may be the breed code of their designated breed. Gen 1 Bombay, Burmilla, Sphynx, Tonkinese, Selkirk Rex, and La Perm may all be registered or re-registered according to their designated breed code and exhibited accordingly, provided they are not variants.
8. **Persian progeny from exotic matings** also carry dual registration, e.g. PER A (EXO A) but are exhibited and judged as Persians.
9. **All Cymric, Isle of Man LH, LH Folds, Manx and Isle of Man SH** follow the established breed code system for registration purposes. These varieties do not yet have individual colour code for show purposes. Scottish SH and Scottish LH are to be exhibited as AOV S as detailed above.
10. **Abyssinian progeny from Abyssinian x Somali matings** also carry dual registration, e.g. ABY (I) but are exhibited and judged as Abyssinians.
11. **Cornish and Devon Rex** have individual Breed Codes for all colours and patterns for registration purposes only. For show purposes these cats must be exhibited as Breed DRX Devon Rex and Breed CRX Cornish Rex. These Breed Codes for registration purposes are not shown on this list. (Therefore those registered as DRX Z and CRX Z must still be exhibited as Breed DRX or Breed CRX, and their Challenge Status is unaffected, as all colours are acceptable under the Group Numbers of DRX and CRX.)
12. **Variants Balinese and Javanese** are now registered and shown as Siamese and Oriental but with an (I) as a mandatory part of the code
13. **Selected Breed Tonkinese (TON):** Tonkinese are allocated Breed No. TON and are registered according to colour, however all Tonkinese shall have their colour expression (sepia for Burmese expression, mink for Tonkinese expression, and pointed for Siamese expression) recorded at registration and in addition the registered colour expression of adult cats shall be stated on entry forms for exhibition and entered in the Judges books.
14. **All agouti cats conforming to one of the four recognized tabby patterns** (Classic, Mackerel, Spotted, Ticked) shall be recorded as such at date of registration and in addition the registered pattern of adult cats shall be stated on entry forms for exhibition and entered in the Judges books. (AGM 89).
15. **Dilute Modifier. In all breeds which recognize the dilute modifier, caramel cats must be registered with their base colour.** At this time Dilute Modified (Caramel) Cats are to be shown collectively as "Caramels" (Dilute Modified) unless the Breed has accepted base colours for showing Purposes i.e. Apricotpoint Siamese or Apricotpoint Birman
16. **All polydactyl Maine Coons** shall be registered as MCO(p). This is for registration purposes only, polydactyl and non-polydactyl Maine Coons compete in the same classes at shows.
