

BREED CODE: JAV - JAVANESE

GENERAL TYPE STANDARD

The Javanese is a semi-longhaired cat, derived from the Oriental Shorthair breed. Due to the coat length, the Javanese appears to have softer line and less extreme type. The type and colour of the body, head, and eyes conform in all respects to the Oriental Shorthair standard. The long hair may diffuse, but never conceal the Oriental Shorthair type.

Coat Length and Texture

Semi-long, fine and silky in texture, without undercoat. It will normally be shorter on the heads and shoulders. It is not desirable to have any tendency towards a frill in the neck or throat area. Fine ear furnishing are preferred. Ear tufts may occur. The coat lies mainly flat along the body, but is feathery along the under parts and britches. The tail plume should be long and feathery. NB Kittens may be slow to develop adult coat length.

Colour: All recognized Oriental Shorthair colours and patterns are allowed and the Javanese should conform to those individual colour standards

Eye Colour: To conform to the individual colour standard for the Oriental Shorthair

Nose Leather & Paw Pads To conform to the individual colour standard for the Oriental Shorthair

Scale of Points: The scale of points is the same as for the Oriental Shorthair

Faults which should not militate against an otherwise good exhibit:

- Ⓟ Stud damage on a queen
- Ⓟ Jowls in males
- Ⓟ Tail slightly kinked at the extremity

Withhold challenge certificate or first place in kitten classes for:

- Ⓟ An obvious receding or protruding jaw
- Ⓟ White toe or toes except in bicolours
- Ⓟ Incorrect eye colour
- Ⓟ Permanent squint in eye or eyes (Definition of a squint: when the eyes are so placed that they appear to look permanently at the nose).
- Ⓟ Any kink not at the extremity of the tail
- Ⓟ Lack of Oriental Shorthair type
- Ⓟ Lack of plumed tail
- Ⓟ Definite double coat (i.e. woolly undercoat)
- Ⓟ Body colour which does not adhere to the standard set

ORIENTAL WHITE

Kittens sometimes show a few black hairs on the head before changing coat. This should not be held against an otherwise good exhibit.

NO:	Colour	Coat Colour	Nose Leather & Pads	Notes
JAVW/1	Oriental White (Green Eyed)	Pure white, not tinged with yellow, even and sound throughout.	Clear unblemished pink. Eye Colour: Decidedly green in adult cats. In kittens the eyes may show a blue or yellow tinge.	
JAVW/2	Oriental White (Blue Eyed)	Pure white, not tinged with yellow, even and sound throughout.	Clear unblemished pink. Eye Colour: Clear brilliant blue.	
JAVW/3	Oriental White (Odd Eyes)	Pure white, not tinged with yellow, even and sound throughout.	Clear unblemished pink Eye Colour: One eye decidedly green and one Brilliant deep blue.	

TORTIE

The coat may display two shades of its basic colour and may thus appear to display three or even four colours. The colours may be mingled or blotched, and Oriental. Type which should be excellent is deemed more important than distribution of colour. Barring on tail, whilst not desirable, is not to be considered a fault. A blaze is desirable.

NO:	Colour	Coat Colour	Nose Leather & Pads	Notes
JAVE	Seal Tortie	To be three colours, red, cream and black.	Plain or blotched, black and pink	
JAVE/A	Blue Tortie	Blue and cream, softly intermingled to give a pastel toning.	Plain or blotched, blue and pink

JAVEC/1	Fawn Tortie	Pale pinkish fawn and cream, softly intermingled to give a pastel toning.	Plain or blotched, pale fawn and pink	
JAVE/K	Caramel Tortie	Bluish fawn to warm beige and varying shades of red, apricot and/or cream	Bluish fawn or pink, plain or blotched	

ORIENTAL LYNX

01/2011

Care should be taken to see that the background colour is truly indicative of the colour under which exhibits are shown.

All agouti cats have a tendency to show a light coloured fur in the immediate area of the lips and lower jaw. This is a fault if it extends onto the neck. It is likely that nose leathers, pads and eye rims may vary in colour from the Standard, but this should not militate against an otherwise good exhibit. **A white tip at the end of the tail is a fault.**

Kittens very often do not show their full markings and thumb prints may not be very obvious. Here again, these could develop with age. In adults the markings should be clearly defined. As the full pattern can take up to three years to develop, the ticked pattern in particular can show a "ghost" spotting, classic, or mackerel pattern in the flanks, dependent upon any other recessive pattern carried.

Oriental Lynx must show one of the four recognised Tabby Patterns, i.e. Classic, Mackerel, Spotted or Ticked (refer Main Index for full description), and a combination of any two or more is a serious fault.

NO:	Colour	Coat Colour	Nose Leather & Pads	Notes
JAVF	Seal Lynx	Clearly defined dense black markings on brown background.	Black.	
JAVF/A	Blue Lynx	Clearly defined deep blue markings on bluish ivory background.	Grey-blue.	
JAVF/B	Chocolate Lynx	Clearly defined chestnut brown markings on warm fawn background.	Chocolate or pink.	
JAVFB/1	Cinnamon Lynx	Clearly defined rich warm toned cinnamon brown markings on warm fawn background.	Light tan or pink	
JAVF/C	Lilac Lynx	Clearly defined rich lavender markings on pale lavender background.	Faded lilac.	
JAVFC/1	Fawn Lynx	Clearly defined dense fawn markings on pale ivory background.	Fawn or pink.	
JAVF/D	Red Lynx	Clearly defined deep rich red markings on red background.	Pink.	
JAVF/G	Cream Lynx	Clearly defined darker cream markings on pale cream background.	Pink.	
JAVF/K	Caramel Lynx	Clearly defined bluish fawn to warm beige markings with a slight metallic overtone over a ground colour of paler fawn, including the lips and chin.	Bluish fawn or pink rimmed with fawn, toning with coat colour	
JAVF/KG	Apricot Lynx	Clearly defined deep rich cream markings with a slight metallic overtone over a ground colour of paler cream including the lips and chin. Deeper shades preferred	Pink.	

TORTIE LYNX

These cats usually resemble Tabbies rather than Torties and body type and tabby pattern are deemed more important than clarity of Tortie markings. A blaze is desirable. Ears mottled, but clearly thumb marked. Mottling permissible on tail, ending in a solid tip.

NO:	Colour	Coat Colour	Nose Leather & Pads	Notes
JAVF/E	Black Tortie Lynx	Dense black markings (broken) on brown background but patched with red and/or cream over tabby pattern.	Mottled.	
JAVF/EA	Blue Tortie Lynx	Clearly defined deep blue markings (broken) on bluish ivory background but patched with cream over tabby pattern.	Mottled.	
JAVF/EB	Chocolate Tortie Lynx	Clearly defined Chocolate markings (broken) on warm fawn background but patched with cream over tabby pattern.	Mottled.	
JAVFEB/1	Cinnamon Tortie Lynx	Clearly defined rich warm toned cinnamon brown markings (broken) on warm fawn background but patched with red and/or cream over tabby pattern.	Mottled.	
JAVF/EC	Lilac Tortie Lynx	Clearly defined rich lavender markings (broken) on pale lavender background but patched with cream over tabby pattern.	Mottled.	
JAVFEC/1	Fawn Tortie Lynx	Clearly defined dense fawn markings (broken) on pale ivory background but patched with cream over tabby pattern.	Mottled.	
JAVF/EK	Caramel Tortie Lynx	Clearly defined bluish fawn to warm beige markings and varying shades of red and/or cream over a ground colour of paler awn, including lips and chin, with a very slight metallic overtone. Paler shades are preferred	Bluish fawn, or pink, or mottled with both.	

GOLDEN LYNX

The degree of goldening in these cats may show great variety. Some cats look the same as non-golden Oriental Lynx, while others show great contrast between the colour and ground, this of course being the Ideal. The Oriental Golden Lynx Group may be bred in all four tabby patterns – Classic, Mackerel, Spotted and Ticked.

Ground colour is warm cream to apricot, being more intense on the face and back, with a lighter shade of colour down the flanks, on the belly, and the undersides of the tail and chin, and the furnishings of the ear. Whisker pads, chin and chest light to deep cream.

Challenge withholding faults: grey undercoat

PASTEL

NO:	Colour	Coat Colour	Nose Leather & pads	Notes
JAVP/K	Caramel	Silvery white hair tipped with bluish fawn to warm beige, a metallic sheen.	Warm beige or pink.	
JAVP/EK	Caramel Dapple (Tortie)	Patches of silvery white hair tipped with bluish fawn to warm beige, a metallic sheen and patches of creamy silver hair tipped with apricot.	Pink, or pink rimmed with beige or mottled.	

SMOKE

The undercoat of all Smokes is slightly lighter than the roots of the shaded hairs. Scattered white hairs and rusty or other shadings should not be severely penalised in an otherwise good kitten. The smoke effect is produced by a silvery undercoat combined with overhair that is tipped in colour with a silvery root. There is great variation in the degree of smoking in cats, and breeders should select for those with the greatest degree of silvery roots and undercoat. In repose the coat appears to be coloured, but in motion the silvery undercoat is apparent.

JAVs/KG	Apricot Smoke	Deep rich cream with a slight metallic overtone, over a white undercoat. Deeper shades preferred	Pink	

TORTIE SMOKE

In repose the coat may display two shades of its basic colours and may thus appear to display three or even four colours. The colours may be mingled or blotched. In all tortie varieties, type (body conformation) is deemed more important than distribution of patching.

NO:	Colour	Coat Colour	Nose Leather & Pads	Notes

SILVER LYNX

The degree of silvering in these cats shows great variety. Some look the same as normal Oriental Lynx, while others show extreme contrast between colour and ground. The ideal is the silver with extreme contrast. They may be bred in all four Tabby patterns – Classic, Mackerel, Spotted and Ticked.

BI-COLOUR

Coat Colour: Patches of any one self-colour or pattern accepted in the Oriental Group, and white. Preferably one-third and not more than one-half to be white. Symmetry of design is desirable, with patches of colour on the top of the head, ears, cheeks, back, tail, legs and flanks. The random sprinkling of white hairs throughout the mail colour, or coloured hairs in the white, is a serious fault.

Faults: classes for

1. Tabby markings (in non-agouti colours).
2. Incorrect proportion of white.
3. Brindling or white hairs in the coloured patches.
4. Coloured hairs in the white.

Withhold Challenge Certificate of First Place in Kitten

1. Incorrect proportion of either colour.

HARLEQUIN

Coat Colour: The Harlequin is basically a white cat with colour being restricted to the head and tail with patches or spots. A small body spot is allowable. The breed must be penalised if the colour spots are appreciable more than laid down in the Standard. The random sprinkling of white hairs throughout the colour spots or coloured hairs on the white is a serious colour fault.

Faults:

1. Tabby markings.
2. Brindling or white hairs in the coloured patches.
3. Coloured hairs in the white.

Withhold Challenge Certificate or First Place in Kitten classes for:

1. Too much colour on body.
